

Clark Forklift

Clark Forklift Forklift Training - At present, there are no less than 350,000 Clark forklifts performing worldwide, and upwards of 250,000 in service in North America alone. With five major lines across the world, Clark is proud to be one of the most expansive companies in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, gas, LPG, hand-driven lift trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift, covers more than 120,000 particular parts intended for 20 exclusive models of lift trucks and automated equipment. Your local Clark Seller is your total source for availability of all your components needs offered by Clark Totalift.

Clark features a phenomenal Parts Supply team. The components warehouses are conveniently located in Changwon, South Korea and Louisville, Kentucky to make certain exceptional service to both their customers and their dealers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing producers. Driven to supply the highest level of value and service to our clients, Clark remains on the cutting edge when it comes to improving productivity and benefiting performance.

Clark Totalift has a very impressive international support network. With over 550 locations globally, seller representation in over 80 countries and 230 locations in North America, their high level of dedication to their clients predominates the materials handling market.

By revolutionizing the operator restraint system safety feature, Clark proudly remains a leader of refinement in the industrial equipment and automated forklift industry. This exceptional dedication to safety is now a customary feature on every lift truck.

Clark's recurrent goal to possess the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first lift truck manufacturer across the world to be certified with the internationally accepted quality standard ISO 9001 for every one of their production facilities. Furthermore, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement permits Clark to be ready for any number of environmental restrictions, thus placing them in a prevailing market position.

Lean Manufacturing

Clark has chosen the structure of "Lean Manufacturing" at all of its assembly plants for the reason that this method is particularly economical and allows for minimal use of resources. Developed to ensure maximum efficiency, this system is intended to discover and acknowledge the most efficient ways for production facility stewardship. Clark has completed this transition of its Korean facility. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and production efficiencies.

Engine Design

By working collectively, Clark's product suppliers and engineers communicate towards enhancing product efficiency while minimizing costs. The contemporary value engineering agenda combines modern product development and provides improved consumer support and service within the industry.
