

Prince Albert Order Picker License

Prince Albert Order Picker License - Order preparation operation or order picking as it is more usually known is a method utilized within warehouse operations and comprises staff called order pickers. The order picker's duty is to take and collect articles in certain quantities to fulfill the customer's orders previous to shipment. Order picking is a simple warehousing process. The efficiency in which this task is accomplished can be directly related to the productivity of a supply chain. Hence, order picking is among the most controlled logistic processes. Order picking falls in the category of the warehouse management system.

There are several particular kinds of order picking. The main types comprise: wave picking method, pick to box method, picker to part method or piece picking, sorting systems method and zone picking method.

The pick to box method involves the order picker filling the box with the items from his or her station. The box then moves to the other picking locations until the customer order is complete. In this particular process, there is no movement of the order picker personnel. In the wave picking method, the order pickers move round in order to gather the needed items for some orders. The picker to part method or piece picking is similar where the order picker or pickers move to collect the items needed but for one order only.

In the sorting systems method, there is no movement of the order picking workers. Instead, the products are delivered to him or her via an automated system like a conveyor system or an automatic storage. In the zone picking method, each and every order picker is assigned to one particular area. They are responsible for only realizing order picking in this specific area.
