

Prince Albert Aerial Lift Train the Trainer

Prince Albert Aerial Lift Train the Trainer - The train the trainer program intended for aerial lifts helps to teach the trainers how to safely train prospective operators in an industrial situation. Trainers will be provided with in-depth instruction on the workings of aerial lift machines. The program is provided on an open enrollment basis and delivered at selected training sites. Before the certification, trainers are assessed and scored based on their knowledge and demonstrated skills.

The Aerial Lifts Train the Trainer Certification Program focuses on practical learning and as the top training provider within the business, we provide top notch hands-on training. We give plenty of opportunities to practice the techniques and concepts which are learned in the classroom. Together with hands-on experience, trainers develop general knowledge of instructional methods and machine theory, classroom and field communication skills, and ability to successfully train and evaluate operators. Trainers would gain knowledge about what traits make a successful trainer.

The Aerial Lift Train the Trainer Certification Program teaches the instructional methods involved in communicating concepts inside a classroom and/or field situation. Knowledge requires a training part to be effectual in workplace situations. There are three factors of equipment operation that the trainer should learn how to convey to operators: what to perform; how to do it; and the reason why it must be carried out.

In the program, trainers would be given the latest, detailed reference material to better help them convey the information to equipment operators. The instruction manuals utilized, contain detailed information regarding all aspects of industrial mobile machine operator training. Included in the package are training aids that provide a visual reference so as to improve the learning experience. The equipment-specific training products include necessary materials for both the trainer and the operator: overhead transparencies, videos/DVD's, kinds of equipment, safety message posters; stability pyramids and digital training aids.
